      The fibrous products contain cellulose fibers 20-70,
      CaCO3 15-45, cationic surfactant 0.01-1, biol. active, in water
      not readily sol. surfactant 0.05-1, or CaO2 0.25-6.5 wt.%, and
     balance fillers; and, optionally, .gtoreq.1 biocides. The fillers are selected from .gtoreq.1 of Al2O3, SiO2, MgO, Ca silicates,
     aluminosilicates, BaSO4, Na2CO3, KCl, K2CO3, CaF2, and Fe oxides.
      fibrous products are used as blown thermal insulation, for manufg. molded
     products, and as fire-resistant and thermally insulating panels.
ST
     nonflammable fibrous thermal insulator panel; cellulose
     fiber waste thermal insulator; calcium carbonate thermal
    insulator; surfactant cationic nonionic thermal insulator; peroxide calcium silicate fluoride thermal insulator; binder filler
     thermal insulator; biocide thermal insulator; alumina filler thermal
     insulator; silica filler thermal insulator; magnesia filler thermal
     insulator; aluminosilicate filler thermal insulator; barium sulfate filler
     thermal insulator; sodium carbonate filler thermal insulator; potassium
     chloride carbonate filler; iron oxide filler thermal insulator; thiuronium
     salt surfactant
